

DATABASE MANAGEMENT & ADMINISTRATION

CREATING SIMPLE, SECURE,
RELIABLE DATABASES

Databases are a crucial part of operations across many industries – but, a database is only as good as its security and reliability. Our database experts maintain a high level of performance, ensure data is only accessed by authorized users, conduct regular backups to protect business continuity and generate reports to maintain the health of your systems.

ABOUT M3 TECHNOLOGY CONSULTANTS

We recognize that busy businesses do not have time to guess what IT support their businesses may or may not need. After years of experience, M3TC has developed one simple streamlined solution, our True Blue inclusive service package. All of the support your business needs, without the back and forth, nickel and diming. One package designed to provide proactive system support, so you can run your business and enjoy peace of mind.

PROTECT YOUR VALUABLE CUSTOMER & BUSINESS DATA

Databases contain information crucial to the success of your business and your clients' satisfaction, but most smaller businesses can't afford to bring on a full-time database administrator. We close that gap with database management and administration services. Our main goal is to ensure that your data is secure – especially if you're responsible for customers' personal and financial information. We also conduct regular system backups to protect against data loss from power outages or other disasters. From managing permissions to fixing performance bottlenecks, we make sure your databases are operating at their best.

BUSINESS CONTINUITY

Your databases need to be available around the clock. We implement backup and recovery procedures that help you recover from data loss - due to user error, cyberattacks or natural disasters - in minutes instead of days or weeks.

PREDICTABLE MONTHLY COST

We work within your IT budget, making sure you only pay for what you need. Simply select the IT services that will benefit you most, then pay a flat, monthly fee based on that choice.

ON-DEMAND EXPERTISE

Have a bug, glitch or other minor IT problem that's slowing down your team? We're here to help – just give us a call or shoot us an email. We work with you to troubleshoot technical issues and overcome obstacles to productivity.

RELIABLE UPTIME

Our data replication solutions give you near-100 percent uptime for mission-critical systems. Through proactive monitoring and troubleshooting, we also resolve red flags before they can negatively impact your systems and users.

FULL VISIBILITY

Strengthening your databases requires knowing their weak spots. We run regular, comprehensive health checks to diagnose potential problems and ensure that your databases are operating smoothly and securely.

ACCESS CONTROL

Managing permissions for authorized users can be a time-consuming and tedious process. We handle the logistics of adding and removing users as necessary, while continuously protecting against unauthorized external access.

WE DO MORE THAN DATABASE MANAGEMENT & ADMINISTRATION. M3 TECHNOLOGY CONSULTANTS ALSO OFFERS:

✓ Technology Assessments

✓ IP Telephony Solutions

✓ IT Infrastructure Monitoring

✓ Remote PC & Mac Support
