

# NETWORK DESIGN & DEPLOYMENT

DELIVERING HIGH-LEVEL IT PERFORMANCE

Your technology is only as good as its foundation – even the newest computers won't operate smoothly if your network is aging or poorly designed. We design a network that fits your needs for security, storage and uptime, then deploy and maintain it for optimal performance. Whether you're just starting out or moving to a new location, we'll build your ideal network.

## ABOUT M3 TECHNOLOGY CONSULTANTS

We recognize that busy businesses do not have time to guess what IT support their businesses may or may not need. After years of experience, M3TC has developed one simple streamlined solution, our True Blue inclusive service package. All of the support your business needs, without the back and forth, nickel and diming. One package designed to provide proactive system support, so you can run your business and enjoy peace of mind.

## OPERATE ON A NETWORK CUSTOM-DESIGNED FOR YOU

No two businesses are alike – why should they use identical networks? At M3 Technology Consultants, we believe that a network built for your space, needs and goals will always produce superior results. Starting from scratch? Moving into a new office? Just ready for a full network upgrade? We'll discuss your requirements, goals and plans for the future, then design a network that gives you reliable uptime and highly secure endpoints. With a first-class network, you'll also get the most from the rest of your technology, including computers, printers, servers and mobile devices – helping you boost productivity and slash operating costs.

### 24/7/365 MONITORING

Our team of expert engineers and support technicians proactively monitors your systems to prevent trouble and maximize uptime. In the unlikely event of an interruption, they're in place to immediately solve the problem.

### HIGH-SPEED CONNECTION

Slow connection speeds and high network latency can cost you thousands of dollars in lost productivity and customer dissatisfaction. Experience a smooth connection that boosts efficiency and gives your business a competitive advantage.

## IMPROVED RELIABILITY

Downtime is the enemy of every business. Our top-of-the-line systems offer elevated protection from power outages, cyber attacks and other disasters, so you can work with confidence that your network will keep up with you.

## STRICT USER ACCESS

Keep unwanted eyes away from business and client data. M3 Technology Consultants ensures private data remains private by limiting user access to ensure illicit hands don't access, damage or delete any confidential data.

## COMPLIANCE REGULATIONS

Data loss and downtime can violate legal requirements (HIPAA, SOX, GLBA) which can lead to significant risk and high fines. Our experts stay on top of relevant criteria to ensure you maintain full compliance at all times.

## STRONG SECURITY MEASURES

M3 Technology Consultants removes spyware, adware and viruses, and audits patches, ports, passwords and firewalls. We also track warranties and service contracts, to provide timely security updates and software installations.

## WE DO MORE THAN NETWORK DESIGN & DEPLOYMENT. M3 TECHNOLOGY CONSULTANTS ALSO OFFERS:

- ✓ Technology Assessments
- ✓ IT Infrastructure Monitoring
- ✓ Data Backup & Recovery
- ✓ Cybersecurity Services
- ✓ IP Telephony Solutions
- ✓ Remote PC & Mac Support
- ✓ IT Project Management
- ✓ Cloud Computing Solutions
