

SECURITY INFORMATION & EVENT MANAGEMENT

TRACKING & RESOLVING SECURITY THREATS

Knowledge is power – especially when it comes to security. Our security information and event management (SIEM) solutions gather data from multiple sources to give you a complete picture of your network. Then, we filter through the data to find pressing security concerns and improve the system, so you can close security gaps and prevent cyberattacks.

ABOUT M3 TECHNOLOGY CONSULTANTS

We recognize that busy businesses do not have time to guess what IT support their businesses may or may not need. After years of experience, M3TC has developed one simple streamlined solution, our True Blue inclusive service package. All of the support your business needs, without the back and forth, nickel and diming. One package designed to provide proactive system support, so you can run your business and enjoy peace of mind.

PROTECT YOUR SYSTEMS WITH REAL-TIME ANALYTICS

SIEM aggregates data from devices, servers, network equipment, firewalls, antivirus systems, intrusion prevention systems and more to generate a holistic view of your business's security. SIEM's protection is two-pronged: our experts set up guidelines for your system to flag activity that's out of the ordinary, while SIEM uses machine learning to understand your operations and better detect anomalies. Our SIEM system acts quickly on alerts to close gaps in your defenses, preventing cyberattacks and stopping malicious activity in its tracks. To truly protect your data, equipment and employees, take advantage of SIEM's security insights.

24/7/365 MONITORING

Our security information and event management system proactively monitors your activity to prevent trouble and maximize uptime. In the unlikely event of an interruption, it's in place to immediately solve the problem.

CONTROLLED COSTS

Most small and medium-sized businesses can't afford to procure and run SIEM software or hire technicians to maintain it. By outsourcing SIEM tasks to us, you pay a flat, monthly expense without the upfront investment.

COMPLIANCE REGULATIONS

Data loss and downtime can violate legal requirements (i.e., HIPAA, SOX, GLBA) which can lead to significant business risk and steep fines. SIEM reports play a vital role in adhering to federal compliance statutes.

EASY-TO-READ REPORTS

Our simple, comprehensive security incident reports help you understand your complex systems, identify areas for improvement and serve as valuable documentation in situations like court proceedings.

SINGLE POINT OF VIEW

SIEM exports data from dozens or even hundreds of sources to a centralized management console, where security analysts can more easily spot patterns that fall outside your normal business operations.

SPECIALIZED EXPERTISE

Have a problem that's puzzling your IT department? Our team is here to help. It can be tough to stay on top of all the technical changes happening every day. Now your staff can lean on us when they need to.

WE DO MORE THAN SIEM SERVICES. M3 TECHNOLOGY CONSULTANTS ALSO OFFERS:

✓ Technology Assessments

✓ IP Telephony Solutions

✓ IT Infrastructure Monitoring

✓ Remote PC & Mac Support

✓ Data Backup & Recovery

✓ IT Project Management
